

RADOSŁAW TERELAK

WEB DEVELOPER

CANDIDATE PROFILE

I am a 24-year-old programmer specializing in frontend development.

I have been deeply passionate about web technologies since high school. During my studies, I focused on learning Angular and Typescript. Since 2022, I have been using my knowledge in commercial projects and

I am constantly improving my qualifications in these technologies.

Having worked in a SCRUM environment, I am proficient at collaborating seamlessly with teams, delivering results efficiently, and adapting to project demands. My open and approachable nature fosters a positive and productive atmosphere within the workplace.

My goal is to further develop my expertise within the IT industry and contribute my skills to exciting web development endeavours. Driven by enthusiasm and a desire for constant growth, I am eager to make a significant impact on cutting-edge projects in the ever-evolving front-end development landscape.

RELEVANT EXPERIENCE

JUNIOR ANGULAR FRONTEND DEVELOPER

COMARCH | NOVEMBER 2022 - CURRENTLY

- Developed the Comarch Trade Finance banking web application in Angular 14.
- Implemented new functionalities based on analyses consulted with the client.
- Estimated task complexity and implementation time by carefully evaluating provided analyses.
- Utilized GitLab as the code repository and conducted Code Reviews to maintain code quality.
- Operated in two-week sprints using the JIRA platform for efficient project management.
- Used Jenkins to automate tasks, including generating translations and delivering packages to clients.
- Identified and resolved issues and bugs in the application to ensure optimal performance and a smooth user experience.
- Created and maintained clear and concise technical documentation for code, features, and functionalities.
- Collaborated with backend developers to seamlessly integrate RESTful APIs.
- Utilized stub data during development and testing to facilitate front-end progress independently.

INTERNSHIP - ANGULAR FRONTEND DEVELOPER

HYLAND | JULY-SEPTEMBER 2022

- Developed Alfresco Content Services web app with Angular 14, implementing new features and conducting manual tests using TestRail during the release.
- Utilized JIRA to create, track progress, and verify tickets, ensuring a streamlined workflow within an agile environment with sprints.
- Implemented a Storybook environment for application components, promoting efficient development and adherence to clean code best practices.
- Demonstrated commitment to code quality by participating in code reviews with colleagues, receiving valuable feedback, and continuously improving coding skills.
- Leveraged Travis CI for automated testing, ensuring code correctness and stability throughout the development process.
- Actively engaged in an internal Hackathon, collaborating with diverse teams and embracing opportunities to work with new colleagues.

PROFESSIONAL SKILLS

- Proficient in modern HTML, CSS, and JavaScript, employing these foundational technologies to create engaging and responsive web applications for over 5 years.
- Demonstrated expertise with Angular, contributing to commercial projects for 2 years, and effectively utilizing Git in collaborative repositories to manage version control.
- Proficient in RxJS, leveraging its reactive programming capabilities to efficiently manage data streams and handle asynchronous operations, enhancing overall application performance and responsiveness.
- Skilled in Typescript and Storybook, ensuring robust development and streamlined component design within Angular applications.
- Well-versed in Confluence and JIRA, adeptly navigating agile workflows and sprint-based project management.
- Capable in Figma, GIMP, and Inkscape, leveraging these tools to craft visually appealing and user-centric designs.
- Familiar with Travis CI and Jenkins, leveraging continuous integration to ensure code correctness and maintain application stability.
- Familiar in unit testing with Jasmine and Karma, delivering reliable and error-free code for enhanced application performance.
- Familiarity with React, SASS, and Styled Components, enabling the development of dynamic and stylish user interfaces.
- Competent in handling MySQL databases and WordPress, supporting data-driven applications and content management systems.
- Multilingual abilities: Polish (Native), English (C1), Italian (A2), German (A2), facilitating effective communication in diverse settings.
- Detail-oriented and highly organized, ensuring precision and efficiency in every aspect of project development and execution.

EDUCATIONAL PROFILE

SILESIAN UNIVERSITY OF TECHNOLOGY

BE COMPUTER SCIENCE | 2020 - 2024

- Final grade: 5
- Minor: Mobile Apps Programming
- Developing computer systems and applications.
- Understanding modern computer systems, operating systems, and networks.
- Fundamentals of computer science and software engineering.
- Programming skills, especially in mobile app development (Android, iOS).
- Applying mathematical and specialized knowledge in technical applications.
- Creating websites, mockup designs and simulations.
- Collaborating effectively in programming teams.

ZESPÓŁ SZKÓŁ ELEKTRYCZNYCH - TECHNICAL COLLEGE

IT SPECIALIST | 2016 - 2020

- Obtained professional qualifications: E12, E13, E14
- E12 - Operating Systems & Hardware
- E13 - Computer Networks
- E14 - Databases & Web Technologies
