Radosław Terelak

Frontend Developer

in radoslaw-terelak   venrofi   venrofi.netlify.app

Candidate Profile

Frontend Developer with over 3 years of experience in Angular and TypeScript, passionate about creating scalable and maintainable web applications. Experienced in delivering features for enterprise-grade banking software, collaborating with cross-functional teams in Agile (SCRUM) environments. Skilled in translating business requirements into technical solutions, maintaining clean code, and integrating RESTful APIs. Known for attention to detail, continuous learning, and a proactive approach to problem-solving. Seeking to contribute to impactful frontend projects and further deepen technical expertise in modern web technologies.

Technical Skills

Programming Languages & Markup: HTML, CSS, SCSS, JavaScript, TypeScript
Frameworks & Libraries: Angular, RxJS, Bootstrap, Cypress, Jasmine, Karma
Development Tools: Git, GitLab, Jira, Confluence, Jenkins, Travis CI, MySQL, WordPress
Design: Figma, GIMP, Inkscape, Canva

Experience

Angular Frontend Developer   *Nov 2022 – now*
Junior Angular Frontend Developer
Comarch S.A. – Gliwice, Poland

- Developed enterprise web applications: Comarch Corporate Banking (Angular 17), Comarch Trade Finance (Angular 15) and Mobile Device Management (Angular 14).

- Contributed to 5 production releases, ensuring stability and timely delivery.

- Worked with backend developers to integrate RESTful APIs and stub data.

- Estimated task complexity and delivery time based on functional specifications.

- Implemented new features based on business requirements and client consultations.

- Wrote technical documentation and contributed to bug fixing and performance optimizations.

- Maintained high code quality via GitLab, Code Reviews, Jenkins pipelines and GitHub Copilot.

- Collaborated in a 10-person Agile (SCRUM) team using JIRA and Confluence for sprint planning.

Intern R&D Angular Frontend Developer   *Jul 2022 – Sep 2022*
Hyland Software – Katowice, Poland

- Developed Alfresco Content Services web application using Angular 14.

- Used JIRA to create, track and verify tickets, supporting a smooth agile workflow.

- Developed Storybook for UI components to ensure consistency and clean code practices.

- Participated in regular Code Reviews, receiving feedback and improving development skills.

- Implemented new features and conducted manual testing with TestRail during the release cycle.

- Took part in an internal Hackathon, collaborating with cross-functional teams to explore new ideas.

Education

Silesian University of Technology *2020 – 2024*
Faculty of Applied Mathematics – Gliwice, Poland
Engineer's Degree – Computer Science
Minor: Mobile Applications Programming
Final grade: 5.0

Relevant coursework: Operating Systems, Computer Networks, Algorithms, Mobile App Development (Android, iOS), Software Engineering, Web Technologies, UX/UI Design

- Gained solid foundations in software development, modern systems architecture and networks.
- Designed and developed full-stack applications and mockup prototypes in team projects.
- Specialized in building mobile applications and responsive web interfaces.
- Applied mathematical and specialized knowledge in technical applications.

Languages

Polish (Native), English (C1), Italian (A2), German (A2)
